INTRODUCTION

This issue of Fire Losses in Ontario is derived from statistical data on fire occurrences throughout the province reported to the Statistics Section of the Office of the Fire Marshal. It is based on the format and the reporting system established since January 1, 1983.

The Statistics Section receives more than 15,000 reports each month, including investigation reports on all fatalities, incendiary fires, large loss fires and explosions, as well as reports from fire departments, insurance companies or insurance adjusters.

Each report must be checked by the statistics staff before it is keyed into the system. Changes must often be made by the staff, and telephone calls made to the various fire departments to check and correct information.

It would be helpful if the fire departments would make use of the remarks section on the back of the forms to aid the OFM staff when they are checking them over.

Accurate statistics depend on many people, from the person who reports the fire, to the dispatcher, the fire fighters, and the person completing the forms.

To expedite the processing of these documents, the province is divided into geographic areas and one staff member is reponsible for each area. This is to ensure that the fire departments are familiar with the staff member responsible for their documents.
